

AMENDMENTS TO THE ABSTRACT OF THE DISCLOSURE

Please amend the abstract of the disclosure at page 116 as follows:

This invention discloses an arrangement ~~which allows connecting~~ allowing connection of various kinds of image displays to one supply source in an image display control system having a supply source for transmitting a signal including at least a video signal, and an image display for receiving a the signal ~~from the supply source~~ and displaying a corresponding image. The supply source acquires characteristic data of the image display when ~~the supply source~~ it is powered on, determines a signal communication specification with the image display based ~~on the basis of~~ the acquired characteristic data, and communicates a signal including the video signal with the determined communication specification. The image display transmits characteristic data for specifying the characteristics of the image display to the supply source, and communicates the signal including the video signal in accordance with the determined communication specification. This invention also discloses an arrangement ~~which allows easily~~ permitting changing the specifications and version of the control program of the image display.
